Download

After years of development and years of testing, RFS has finally been released and it looks great. Developed by realflight simulators (RFS) it’s a great flight simulator that is fun to use. RFS offer a choice of airplanes: One of the most popular models is the Piper PA31, which is a single engine tricy engine fixed-gear plane. Other models include the Cessna 182, the Piper Aztec, the Piper Cherokee and the Piper Arrow. Do you already know that RealFlight Simulator (RFS) is a flight simulator you can use on your smartphone to learn the world of aeronautics? No matter where you are, the best flight simulation takes you and fly with your device. From the window you are like in your living room, you will find a fun and exciting journey. If you have doubts, we encourage you to try it and enjoy! But at the price of the starter plane, you can already fly on the simulator’s virtual sky and enjoy free! But wait, it is still not enough to play safely. The best part of the flight simulator is the virtual sky, which is a completely realistic simulation of the real sky! No less than 200 airports, more than 250 airplanes and 20 different aircraft add to the realism of this flight simulator. If you are not a pilot, check it and get an adrenaline rush! But, of course, your children can fly with you! If you plan on taking flight lessons, you’ll need an instructor in the real world and a mentor in the virtual world. In addition, the RealFlight Lite pilot’s manual, FAA approved, is available free on this website as well. A lot of features are included with the options already mentioned, you can find all the information on the box at the very bottom of the interface. 5ec8ef588b
