Losing weight (especially when you're a male) is difficult. I've struggled with my weight for years and have developed an arsenal of strategies to help me fight it off. Some are more effective than others and some are quite expensive. Here are my top 3 tips for losing weight:

1. Eat meals regularly. Eating meals is the easiest thing to do. It's also the easiest to cut back on. It's tough to give up something you've got used to, especially if it's your favorite. I've had to cut back on eating due to various reasons, but it's the easiest to do when eating is part of your daily routine. I find that even if I eat breakfast I still don't feel like eating all day long, so eating with a regular routine is best. Don't get in the habit of skipping meals though, that will make it harder to lose weight. It's

Increasing Medicare payment to physicians for surgeries has been based on how much surgery costs to provide. Increasing Medicare payment to physicians for hospital services has been based on the severity of a patient's condition. We calculated the increase in payment that should be paid to physicians in the last 10 years, and we're comparing it to what Medicare paid them before July 1st, 2009. Dr. Feinstein, do you want to go first or is it your turn? DR. JOSEPH FINEENSTEIN: Our time, I think. Dr. Hauser, do you want to go next, or is it your turn? DR. NEIL HAUSER: I'd like to go first. I'm interested in how it was decided that the payment increases should be based on cost, but the payment for hospitals should be based on the patient's condition. It seems like an odd choice to me, but, uh, I guess they came up with it. DR. JOSEPH FINEENSTEIN: So, in the article I cite here that Dr. Hauser cites here, he says that the cost-based increase is premised on two assumptions. First, that the costs of carrying out a surgery have increased. And, second, that those costs are a good proxy for the level of medical service needed to provide that surgery. These assumptions seem like a rather strange bedrock on which to base the proposed increases. How exactly do we know that the costs of providing surgery have increased? They've gone up a lot, and that's the
