Xilisoft iPad Video Converter is a neat software tool that will allow you to convert just about any video (even HD) format into iPad video formats. A video converter with a familiar looking interface Like the many other converters from the same developer, Xilisoft iPad Video Converter follows the same GUI design, allowing those of you familiar with other similar products to figure out how things work easily. The conversion process is pretty straightforward, as all you have to do is add a video from your library into the app's window, either by browsing or via drag-and-drop. Once you've added the videos, (the program supports batch processing) all that is left is to select the format profile you need it converted into. A versatile iPad video conversion tool The app currently offers support for over 20 video profiles, most of which are primarily dedicated to iPad devices (e.g., iPad 2, 3, 4, mini, air, etc.). However, it does over some general conversion profiles such as MP4, WAV or MP3 audio files. Once you've selected the profile, you can perform some video adjustments to meet whatever requirements you may have, like video size, quality, or audio quality. You can preview the video before starting the conversion process to ensure that everything is all right, and finally, you can press the "Start" button. A good tool for those who watch movies on their iPads While there are plenty of other video converters out there tailored towards iPad devices, few can offer such a large list of profiles, making this a great tool for any iPad owner, regardless if the devices is an older model or not. ... 0.8/5 0.8 1857 0.7/5 3731 0.7 8.5 0.7 3516 0.6 7.1 0.6 1149 0.6 11.8 0.6 1292 0.6 14.0 0.5 1257 0.5 13.5 0.5 1274 0.5 13.0 0.4 1293 0.4 14.6 0.3 1047 0.3 13

Help!!!! I am writing a review on 'Xilisoft iPad Video Converter' and am having difficulty finishing it as I keep getting a 'Not Found' Error message when I click 'Finish' on the last of the 5 Save Steps. It keeps coming up with 'The remote server returned an error: (404)' - Other sites seem to work fine and I have no idea why. This is the 5th time I have tried to upload this review but still can't upload it. Can you please point me in the right direction?
