
N4 Sou Matome

Category: Japanese-English dictionaries; Category: Japanese dictionaries; Category: Japanese Language Proficiency Test1; Field of the Invention: This invention relates to a process for the production of a non-whitening product. More specifically, the invention provides an alkaline earth metal silicate dispersion. Description of the Prior Art: It is known to produce alkaline earth metal silicate dispersed in aqueous systems. This has been achieved by mixing an aqueous system with both sodium silicate and either an alkaline earth metal base or a magnesium base, forming a stabilized colloidal dispersion by adding a liposulfonate to form a stabilized colloidal dispersion, and setting the dispersion to produce a stable, non-whitening, stable, non-whitening alkaline earth metal silicate dispersion. However, the use of magnesium base has been found to create problems with pH control in the manufacture of certain products. To reduce the pH of a magnesium base system to the required low pH, as for example, 2.0, can be very difficult. A final pH in the range of 4 to 6 is not unusual. The use of liposulfonate is critical to obtain a stable dispersion in these systems. Thus, the use of such systems to prepare a pharmaceutical product can be very difficult. Another problem with conventional compositions is the lack of stability of the composition. The magnesium base system is known to be unstable in storage. Under certain conditions, even when a silicate dispersion is prepared, it is found that the dispersion begins to coagulate in a matter of hours and sometimes a few days. This, in a matter of hours, days or even weeks the dispersion can lose its ability to prevent calcium carbonate from precipitating in the system. It is known to produce alkaline earth metal silicate dispersed in aqueous systems. This has been achieved by mixing an aqueous system with both sodium silicate and an alkaline earth metal base, forming a stabilized colloidal dispersion by adding a liposulfonate to form a stabilized colloidal dispersion, and setting the dispersion to produce a stable, non-whitening, stable, non-whitening alkaline earth metal silicate dispersion.
