Photos: 2017's most influential advertising trends The end of 2016 saw a slew of influential advertising trends take off in 2017. To prepare for the year ahead, a few of the most noteworthy are now being analyzed, giving brands a chance to position themselves in front of their audience before it's too late. 1. Hitting the brakes on digital In 2017, large brands have taken more notice of the user experience they create for digital customers. Many are seeing a spike in customer service complaints that stem from inadequate or poorly designed platforms, which are affecting brands in ways they may not have anticipated. By taking a more human-centric approach, these brands have been able to build a better connection with their audience, and their digital customer experience is, in turn, improving. The most notable example was GM's decision to kill the Chevy Volt plug-in hybrid, a short-lived vehicle with a low marketing budget. In a public statement, GM CEO Mary Barra said, "While the Volt had a bright future, we need to be sure we are taking all necessary steps to create long-term shareholder value." GM needed to shift its focus on attracting a broader audience. It also had to reconsider its product portfolio, placing more emphasis on cars that consumers will be able to drive for years. This philosophy is being reflected by the new Porsche Design, which will have a full roll-out in 2017. The brand is not looking to replace the Porsche 911 with the more in-your-face Panamera. Instead, the brand wants to make its more attractive model more accessible. It will offer the Cayenne, 911, and Boxster models in the same pricing tier. And it will make that tier more affordable by introducing the new Macan at an entry price of \$66,000. "We want to make premium Porsche as affordable as possible," Porsche Design CEO Stefan Wendt said. "Many Germans are starting to buy their first Porsche in their 30s. We want to reach younger, new Porsche buyers." Wendt is also optimistic about the U.S. market, especially in the luxury car market, where Porsche is expected to see growth. 2. Creating greater value For years, advertising has been used for the sole purpose of
