Nintendo Super Mario Bros. was originally intended to be a single game titled Mario Bros. The game was first revealed during a Nintendo Power Magazine article on January 27, 1986. The game was the first to feature a player character with a non-human face; it was also the first of the Mario series to feature a playable female character; Princess Toadstool. Mario Bros. became the first game published by Nintendo to sell 3,000,000 copies in the United States alone, spawning several sequels. The game's sales were also a factor in the company's decision to create the Super Mario All-Stars series, which featured 16 different characters instead of the original four.
