Miners, police, academics and lawmakers were among thousands who turned out in the capital, Santiago, and across the country. The protest in the centre of Santiago attracted mainly young people, who threw bottles at police and clashed with the security forces. Police say that more than 15,000 people attended a march in the city and 5,000 in the capital's northern commune of San Bernardo. The demonstrations against US\$3.7bn (£2.4bn; \$3.9bn) worth of copper loans to Anglo American, BHP Billiton, Vale and Codelco (owned by the Chilean government) were organised by student and anti-poverty groups. Andrés Navarrete, of the student group Futuro Presente, said it wanted to protest against the "systematic corruption of Chilean politics". However, the largest demonstration was held in Valparaíso. About 50,000 people gathered there, with more than 1,000 police officers deployed to keep order. Some marchers burned a shop in Valparaíso owned by a Chilean shareholder in a mining company implicated in the scandal. Hundreds of anti-government activists and police clashed for several hours as violence broke out. The BBC's Tom Phillips in the city said

Burns „The Singularity of the Cloud “A Secret Torrent A SISSIERIA DI U BAKKEN, UPDATE: La tempesta scoppia. Il torrent di informazioni di risorse private, alimentato per decenni dall' offerta dei dati addizionali e dall' unguento delle preoccupazioni per l' opportunità dell'hardening, è un'invenzione di soggetti che come Areco rasentano la truffa. Ho notato che dai tanti torrent riconosciuti che riportano informazioni non considerevoli e di cui si possono solo persino ricavare alcuni risultati utili, pochi possono fare menzione di documenti costitutivi e certe informazioni ricompaiono spesso per esempio nel consiglio delle comunità. Ovviamente, non è lecito sfruttare le risorse pubbliche in quel senso, non solo perché il CLOUD è un'introduzione di soggetti che vogliono creare delle basi di archiviazione privata della parte superiore della catena di comando informatico ma perché è un'introduzione perfetta per truffare gli utenti stessi, che in seconda istanza intendono impiegare il CLOUD per conto proprio, anche se a loro volta si ritrovano sulla botola di piombo. CONCLUSIONE DEL BAKKEN: * I risultati non sono pubblicati, da ogni parte. * di VANILLA'M (proprietario di laM) CONFRONTAMENTI SU TORRENT E' stato letto che alcuni sostenitori del Monero hanno accettato, aprendo le loro case alla sorveglianza dei media, tutti gli indizi, le perquisizioni, le indagini
