For any two unbounded sets U and W, the closure of U and the closure of W can be disjoint I am reading Hartshorne Exercise 1.5, he use $\overline{U}$ to mean the closure of U, and then write: For any unbounded set U, the closure of U is a subset of every closed set W and therefore the closure of U is a closed set. Why is it true? Is there any explanation? A: Let A be an unbounded set in $\mathbb R$, and B be an unbounded closed set. Then there are two possibilities: A is closed. In this case, $\overline A=A$, and hence $\overline A\subseteq\overline A\cup B=B$. A is not closed. Then A is the union of a non-degenerate closed interval and U^c for some unbounded $U\subseteq\mathbb R$. In this case, $A\subseteq\overline A=\overline A\cup\overline B=\overline A\cup B$. Studies in this

Reviews of Tarnished Gold "A Game That Can No Longer Be Mistaken for Anything Else El Día de los Muertos (Day of the Dead): A ghostly princess finds her long lost family, an eccentric scientist is trying to rescue a world-devouring monster, and space pirates are on the loose! Each story has its own setting, but they're tied together so well that it's easy to get lost in the world — which is what makes the title so special. At some point when we were kids, we were all in love with the artwork in the first Final Fantasy, but most of us got over that fever pretty quickly. The style of Final Fantasy X, which was Nintendo's first entry into the 21st century, was almost like a throwback to the type of games people played in the '80s. A few years before Final Fantasy X, Square Enix released a little game called Final Fantasy Tactics that probably wasn't anything close to the ideas of even one of the big "final fantasy" stories, but that game is undoubtedly the best mobile strategy game ever made. Final Fantasy Tactics was billed as being a real tactical RPG because of its strategic turn-based battles, but it wasn't just a bunch of tactical games bound together — the software included a fully fleshed-out world where you could wander around at your leisure, only to discover hidden characters, side quests, and even plot twists. This was a whole new approach to the traditional RPG formula. El Día de los Muertos is a game based on the Final Fantasy Tactics world where you can play in various scenarios, take on a ton of quests, and eventually play in one gigantic minigame called the "Final Fantasy Warriors" where you can discover and play dungeons in a turn-based format with up to a 16-player party of your own. The main plot arc is so strong that it's easy to spend hours just finishing the missions and clearing out dungeons. The thing about this game, though, is that despite the simplistic story, you often find yourself having to make difficult decisions in extremely dire situations — a situation that comes naturally to the grand tale of Final Fantasy Tactics' story, which is why this game can't really be considered a simulator." THE NEW

JBlueBox Thesis 9yfzs9z Hello, my name is Steve. I'm a iOS developer from Belgium. I released 2 apps on the App Store before, and 1 on Google Play. I really enjoy playing games on my iPhone and I want to make a game that will bring fun back to mobile games. I read lots of articles about mobile games on IGG and I was really impressed with the gameplay that you are used to, but I want to create a game that won't require you to dig deep on learning how to play, but yet still bring you a great gameplay experience. The time I use to start the game will give you the impression of the gameplay, but I didn't have an idea of how to bring you all the fun. The game will have a steampunk style, with lots of puzzles that are different but have a good feeling to them. The adventure will lead you to different places in an atmosphere in which you'll feel you are actually in a good story. The game is divided in 3 Acts, and depending on the character you create, you'll be faced with different situations to solve. You can find the characters in the second screenshots: - The "Pawn", who is the protagonist of the story. - The "Bishop", who used to work for the "Elden Ring". - The "Knight", who will guide the way in front of the other characters. - The "Duchess", who has a great imagination, and is also the main villain of the story. - The "Dragon", who has a great power in his hands. There are many different types of enemies. They aren't freaks, but have different personalities that will make each battle interesting. I want the game to have such a beautiful style that even if you're not a big fan of steampunk, you'll love playing it. I like a retro style, but it is not mandatory. I want the game to be accessible and not to require a lot of studying to be fun. This game won't be a time to trial and error, the gameplay is designed in a good way. It won't be easy to solve puzzles, and you'll probably have to
