SwapQuest Soundtrack

SwapQuest is a fun, lighthearted adventure game, where you play the role of Lumina, the travelling trader, who wakes up on a cloud of her own making. You have a week to make money by buying and selling goods in different locations across a map-like environment, and you have the help of Isaaru, the celestial being who lent you the power of flight. To get around, you can fly with Isaaru or hop around on foot as a normal Lumina.

SwapQuest features pretty much everything you'd find in a game of the genre, even a multiplayer mode with real players that you can trade with online. The storyline is wrapped up in a storybook ending, with some surprises along the way that let you know there is more to the world of SwapQuest. And the soundtrack? It's all original soundtrack music by San Francisco-based composer and sound designer Tim Stephens, with an overall length of 54 minutes. What's new in SwapQuest Soundtrack:

Too rare for beyond a release on cassette (a high point of the movement of 99' sounds and sounds of the time), the acclaimed soundtrack of the Dutch rock 'n' roll band, 'Ze Call' has been finally released on an audiophile vinyl 2-record format. In addition to the original recordings of the main band, the LP contains extracts of audience recordings from live performances of the band in many clubs. The concept of a 'Ze Call Soundtrack' had, together with the label 100dB, been developed in collaboration with the Dutch promoter and radio producer, Pietus Nihardus. A portion of the sources are still used by Pietus Nihardus today. The unique availability on vinyl means that it is relatively difficult to find, so the impact in the audio department is extreme at this moment. Additionally, the Soundtrack includes an interview with the band, an insight into the recording of the album and a biographical programme about the band. Extracts from audience recordings As this project contains in its first part of two vinyl records recordings from audience recordings of live performances of the band at various clubs, we will be able to distinguish the best performances of the band. This section of the LP holds (non-album) alternate versions of five tracks: 'All About You',

'Twins', 'Where Are You' and 'Ain't No God'. Some of the selections are certainly difficult to find. The promoter of famous lives clubs of the time, Pietus Nihardus, produced A wonderfully expanded version of the dialogue between Pietus Nihardus and the 'Ze Call' band in this live recordings. A variant that has for a long time been missing here, and of which we just recently discovered the original source. The music of the cult band has been recognised for many years as highly representative of its time. Sony Music was the only one with the necessary permission to reissue the entire Ze Call album on their own label. In 1990, the record label Dux included a large soundtrack with the Ze Call album on Jiji label from Japan at the time. With the Universal Music B.V. they published in 2011, the Ze Call album Soundtrack on Audio Fonogram of the Sponjaard legend. Ze Call: Although originally consisting of four members, the cult group Ze Call started with a group that included five members. The success that followed was rapid and critical, despite the fact that the fan camp was
