in the country? Well, this is your lucky day. The Federal Marshal Dutton and his son, Jed, have been sent on a personal mission. Reaching the final town before the line where the night has fallen and the snow covers the roads, Jed has gathered a posse of fellow marshals to accompany them, and they've reached the decrepit and untidy town of Roscoe. Jed and his small group are about to cross the great divide between the straight and the crooked when they are attacked in a bar. Things begin to seem like they may be going all wrong when news comes of other unusual incidents. The local sheriff, a close friend of Jed's, has been ambushed by the outlaws. The sheriff, a former street-tough during his days as a lawman, is now holed up in the town's jail, bleeding and in the throes of a terrible, murderous rage. And there are

Get Packed: Fully Loaded is a cooperative couch co-op game that tests your ability to survive against the odds, in a deadly demolition derby where every second of every level is stretched and twisted into a new game of its own. So don't lose the team, or you'll die trying! The game is aimed at an audience that enjoys the adrenaline rush of physical, moving entertainment. With a crash of gamification and the endearing story of a small town getting the heave-ho, Full Loaded delivers a quick, frantic, and humorous elimination round for the entire crew. collapse). Get Packed: Fully Loaded is designed to allow each player to have a significant advantage over the others and a sense of ownership in the destruction. The game is full of both offensive and defensive game play. The offensive elements are primarily composed of Gamification, which is the amount of destruction (in stock). The player with the lowest stock, who also manages to avoid being wrecked by a collapsing landmass, wins the round. With the defensive elements being covered by the breakable stock system. The player with the highest stock will be able to withstand the highest amount of damage. Game Controls: Game controls are designed to emulate those of classic puzzle platform games of old, in that players can grab or manipulate the environment in order to move around, as well as move blocks. The game does not allow for pure puzzle platforming, as movement is restricted. Controls are also simple
