I have 2 queries that I want to combine that will get 10 rows per group (in the case of Flights). I need these to run as quickly as possible, so feel free to suggest an alternative if you have a better way to do this. Thank you for your help! select sum(PLST.Passengers) from (select (count(*) as cnt) * 5 as passengers from q_PassengerType as PT inner join q_FlightType as FT on FT.PassengerTypeFK = PT.PassengerTypeFK where Pt.Active = 1) as PLST select sum(PA.Passengers) from (select (count(*) as cnt) * 5 as passengers from q_PassengerActivity as PA inner join q_FlightType as FT on FT.PassengerTypeFK = PA.PassengerTypeFK where PA.Active = 1) as PA A: I need these to run as quickly as possible, so feel free to suggest an alternative if you have a better way to do this. I guess You should split that into 2 queries and have an additional query which combines both queries like this: select sum(PLST.Passengers) + sum(PA.Passengers) as TotalPassengers from (select (count(*) as cnt) * 5 as passengers from q_PassengerType as PT
