Decompiler Pro. This page will explain how to install the Windows driver for a Galaxy H558 tablet device from Samsung. You will need to download a driver for your specific computer OS. In addition, the device might be sold in a multibillion-dollar global TV ad campaign (with sales of more than \$20 billion in 2013). Or maybe not at all -- it's a Samsung ad, after all. Actually, though, the tablet comes with a third-party Samsung application, the Octovideo application, which allows you to watch TV and movies on the tablet device. Note that Octovideo is NOT the official Samsung application, so your TV and movie output will not match Samsung's official TV apps. The Octovideo application can be found in the Google Play Store. Model Description A new Samsung Galaxy Tab H558 7.0" is currently selling for \$349.00 in the United States. The gadget features a stylus that should make texting on the tablet easier than on the iPad. The model in the video below has a 3G connectivity. The newer H558 7.0" has Wi-Fi and Bluetooth. It's also 10.2 mm thin, has a 1.2 GHz dual core processor, a pixel density of 287 ppi, and a 3000 mAh battery. The gadget weighs 6.4 oz (approximately 218g). You'll need to download the drivers for your PC so you can install them in your device. 1.
