the crack (or keygen) works on windows but doesnt work on
mac. theres no other way to put this clearer. ive tried literally
everything, even tried installing version 1.1.2 with its own
crack. didnt work. tried choosing the right name in the keygen
(sublab and not circle), didnt work. uninstalled a couple of times,
restarted mac, erased everything and tried again it always asks
for activation code. answer is simple, either we buy it or we wait
for a real cracked version for mac. we are not dumb. ive been
using ableton on windows since 2005 and on mac since 2010,
ive installed a bunch of plug-ins, and i know for sure when one
doesnt work, and this one does not work on mac. period
