**Dish Network Acquiring Signal 535 Stuck [VERIFIED]**

[Download](#)

---

dish receiver error ea32dish  
problem/solution: please check to make sure you are connected to the internet and that your connection to the internet is active. furthermore, please check your satellite power. if you continue to have problems, please contact technical support. sometimes it can be frustrating when the signal on your television set goes out, especially if it's right in the middle of a march madness tournament game. before you get too worked up and call your local dish network serviceman to come out and fix your tv there's a few easy steps you can take to make sure your satellite tv system is working properly. there's also an issue with dish network that i have been having with my dish hopper that seems to be affecting a lot of other people. when we first signed up with the dish network company years ago, it worked great, and we didn't have any problems. i was a little skeptical when she, our teenage daughter,

---

called for the first time to set up our hopper, because she knew how i could be hard to get ahold of, so we weren't going to be happy with the service if she couldn't get ahold of me. she ordered a hopper with dvr and i had to help her set it up. for the first several months everything worked well and we were very happy with the service. there was only one problem - a big one, that made us very unhappy with the service, but in a way that we weren't really sure why it was happening. the remote didn't have an on button. we could watch live tv on the hopper, or on the dvr, but if we wanted to rewind, fast-forward, or pause a recorded show, we had to use the tv guide remote control. (but you could still get the on button if you were watching live tv.) our dish was directv, so we didn't have the option of using the dish tivo (which is like a tivo box with an antenna.) we were able to keep watching programs, or if we had to, we could manually fast-forward

---

through the recorded shows on the dvr's recorded menus, and then watch something else while it recorded. when she got back home after we set up the hopper, she was so annoyed and frustrated with the lack of the on button. even though it was a big problem for her, we were happy with the hopper.

### **Dish Network Acquiring Signal 535 Stuck**

I am having the same problem. Whenever I turn on my receiver, the error code starts with 535, and after a minute or two, the receiver resets. I live in San Diego and the best service is with DISH, but I am having a very frustrating time with the Tech support here. Dish TV support is terrible and that is why I switched to them. Right off the bat, I want to let you know that I don't have a satellite dish, and I don't expect I ever do (when I moved into my house 11 years ago, someone had stuck a dish in the

---

middle of my yard). I've had DISH for about 2 years. Anyway, this has happened 3 times now. My son-in-law will get up to go to work, and he'll turn the DISH box on and the receiver will start to display the message "DISH Receiver Error 535" and after a minute or two it will reset. Every time it's the 3rd day of the month. I just thought that was odd, but the same happened last week, and it was the 10th. I came home today after a rough day to discover that my signal was stuck again. The only way I can watch any of the networks is to call the DISH customer support line. I have the DISH mult-room DVR and it has been working perfectly for at least five months. I have done all the troubleshooting I can, and this is a problem that keeps repeating itself. Is there a DISH Technologist that can come out to my house to troubleshoot? I am willing to pay for the cost of the technician, but I just need one of you guys to actually come out

---

and troubleshoot the problem. I have DISH, but recently the dish receiver has been getting off the screen a lot, and its been stuck on the same page for days. I can't watch the radio, or any of the other channels. Does anyone know of a way to fix it so I can watch the channels I paid for.
