Research Data The UNU Oceans and the First Fridays Project is currently documenting and collecting the following data: Charts of ocean surface currents Charts of ocean currents in the air Charts of ocean currents in the deep sea Paleoclimatic data from sedimentary rocks from the ocean floors Web-based ocean observation data collected by volunteers. Our current science project seeks to help generate such charts of deep ocean currents and currents in the air. Nandini Goswami (UOW) is collecting deep water sedimentary data for the UNU-Oceans Project in three

underwater sites in the Southern Ocean. She will be using sedimentary rocks which have been collected since the early 1990s by the USCG Atlantis and the M v R multi-beam system, which were deployed between 2004 and 2005. The Atlantis system was retired in 2007 and the M v R in 2009 and is no longer available to researchers. Links to data is not yet available.

When Nandini's data is released, it will be made available through the UNU LTER project. Links to UNU Oceans Project Data are below. Existing Link: Are you a scientist? No problem! We want to know about it! If you want to contribute to UNU Oceans, let us know. The Geological Survey of New Zealand has pioneered techniques for high-resolution mapping of deep-sea, sub-permafrost and mid-submafrost
